Attitudes to the
childhood vaccination
programme in parents

89% of parents of children under 3 years and 4 months were **spoken to by a health professional about vaccines**

75%

of parents reported that a health professional first spoke to them during pregnancy or after birth but before the first vaccines were due

14%

of parents reported that a health professional first spoke to them when they took their baby for the first vaccines

5%

of parents did not talk to a health professional

5%

of parents couldn't remember

The data is taken from the Attitudes to the childhood vaccination programme in parents of babies and children under 5 years of age survey undertaken in 2022. UKHSA Immunisation and vaccine preventable diseases Division. UKHSA gateway number: 2022652
