Attitudes to the
childhood vaccination
programme in parents

Discussion about childhood vaccines with a health professional

95%

of parents felt that their
baby would have all
vaccines offered before
any discussion with
a health professional

42%

of parents who were
undecided about
whether to get their
baby vaccinated
felt more confident
about vaccination
after speaking to a
health professional

36%

of parents felt more
confident about
vaccinating their
baby after receiving
information from a
health professional

The data is taken from the Attitudes to the childhood vaccination programme in parents of babies and children under 5 years of age survey undertaken in 2022. UKHSA Immunisation and vaccine preventable diseases Division. UKHSA gateway number: 2022652
